Dream Home 2022

You'll have the most energy-efficient and architecturally appealing house on the block with VELUX skylights. Our skylights with shades not only elevate your home's beauty and overall value, but they also serve a critical function by letting natural daylight in, which can boost your health and keep your home fresh. And regardless of which room they're installed in, you'll enjoy a room with a breathtaking view.

FEATURED SKYLIGHT:

Our No Leak Fixed Skylights with shades are a dynamic duo of style and function — bringing an intriguing visual element with a clean exterior profile that blends in with rooflines while letting fresh air in. The integrated shades add a layer of insulation and give you total light control, so you can transform your space with natural daylight or diffuse it when needed. With VELUX skylights, you can achieve a beautiful, healthier and more energy-efficient home.

VIEW FIXED SKYLIGHTS

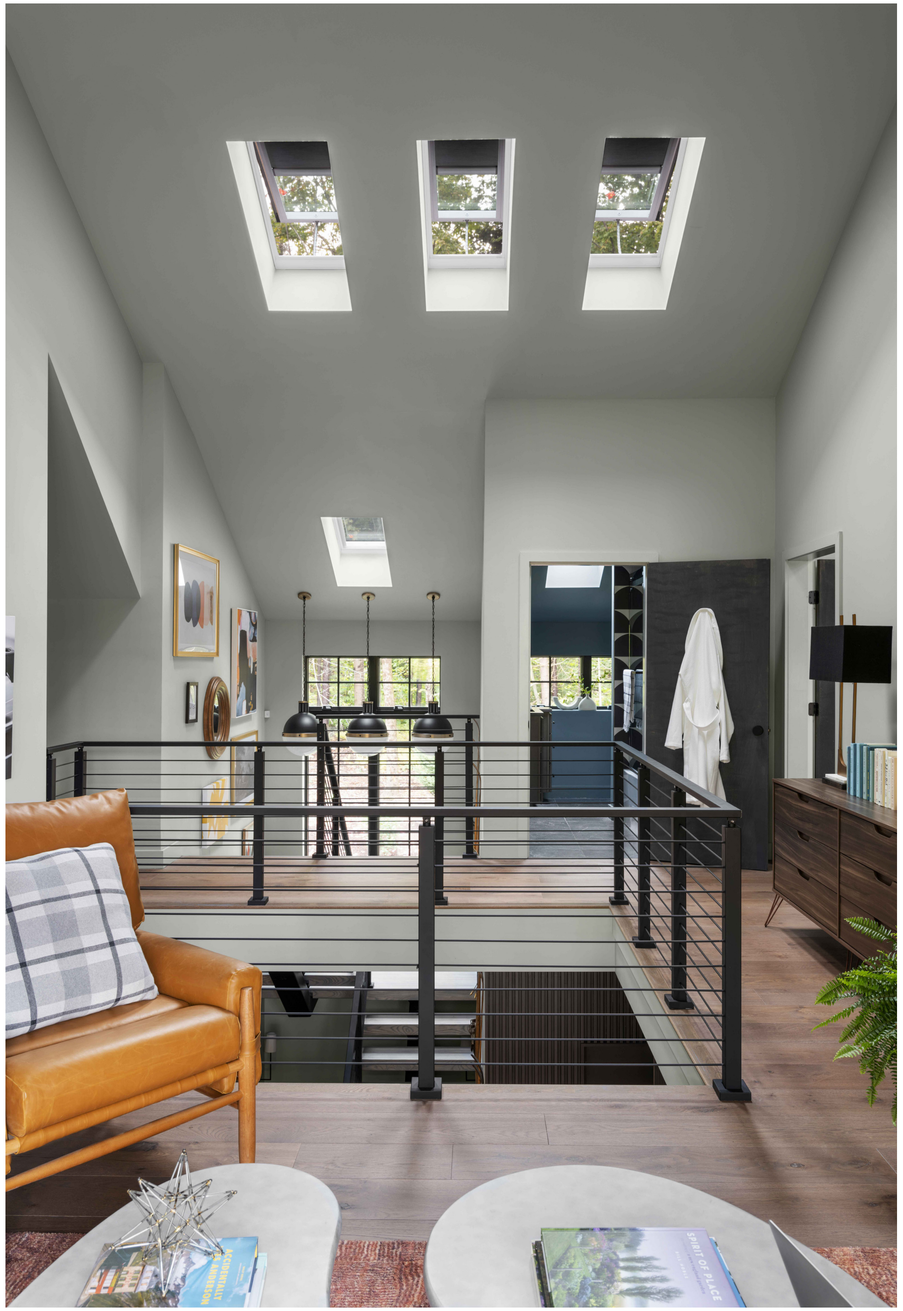

For living rooms, we recommend No Leak Solar Powered Fresh Air Skylights with shades to deliver the fresh air and perfect amount of natural light you need, so you can easily diffuse the light when watching a movie or brighten when curling up with a book. You can expand the look of your space and enjoy the view of lush outdoor greenery from the couch or simply block the light when it's time to get movie night started.

VIEW LIVING ROOM INSPIRATION

Our No Leak Solar Powered Fresh Air and Electric Skylights are perfect for bathrooms. You'll take a soak in the tub or a refreshing shower to the next level with skylights that bring natural daylight while removing dampness and steam without sacrificing the privacy you need. And our Sun Tunnel® skylights are great for smaller bathrooms.

VIEW BATHROOM INSPIRATION

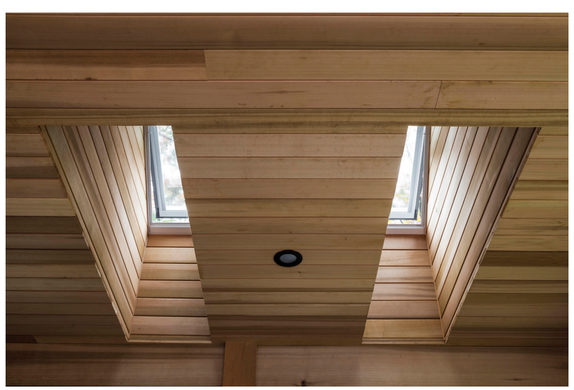

Our No Leak Solar Powered Fresh Air Skylights tend to be installed in the highest and most centrally located point of your house to provide fresh-air ventilation to your whole home, so they're also great for stairwells, hallways and closets. Our Sun Tunnel® Skylights even pull daylight into compact areas.

VIEW HALLWAY AND STAIRWELL INSPIRATION

By adding skylights to your enclosed patio or screened-in porch, you'll be able to bask in more natural light in outdoor spaces while letting interior rooms share in that naturally lit love. There are a variety of skylight models that work on patios and porches.

VIEW PORCH INSPIRATION

Our skylights with shades work well in any space where you want customized light control that transitions with you from day to night — whether it's bathrooms, bedrooms or mudrooms. Shades come in more than 60 colors and patterns to complement any design.

HGTV SMART HOME PROUD SPONSOR 2022

HGTV®
Smart Home 2022

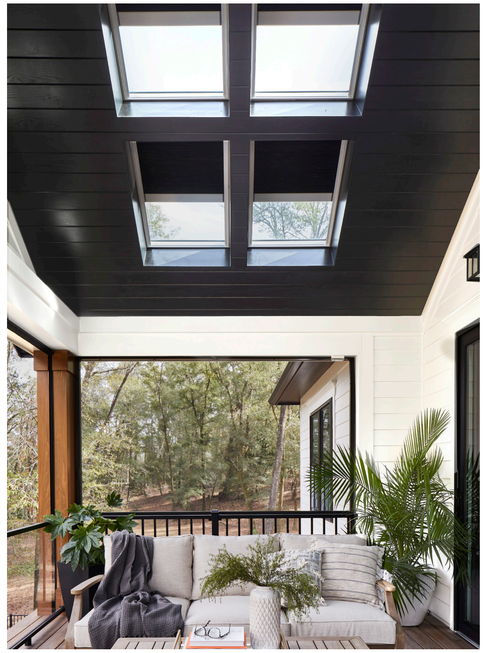

Creating a cozy and inviting indoor space starts with setting your sights on VELUX skylights. Designed to bring natural light and fresh air in, they reduce dependence on air conditioning while highlighting architectural details for enhanced energy efficiency in a stylish package. Thoughtfully created to bring a solution to every space, skylights add visual appeal and open, natural light while still allowing for privacy.

FEATURED SKYLIGHT:

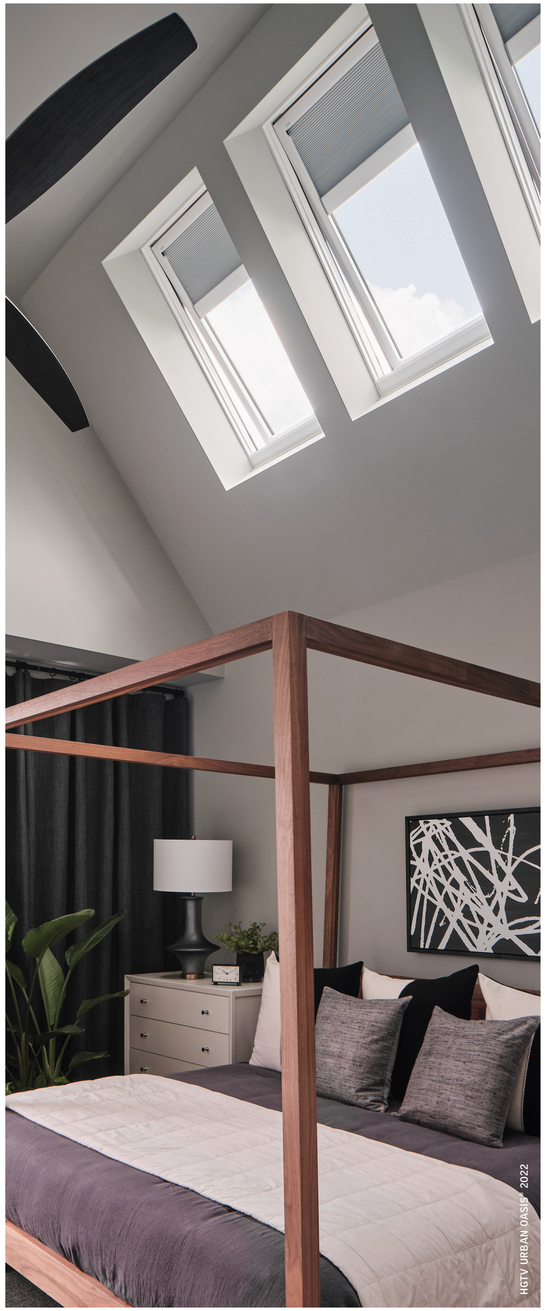

Our No Leak Solar Powered Fresh Air Skylights with light-filtering shades fill your home with natural light and fresh air to open up your space without compromising privacy, making them ideal for most rooms. And because they have shades, you'll have total customization at your fingertips with a convenient remote control that helps meet your needs anytime — whether you're letting light in during the day, admiring the starry sky at night or activating the room-darkening feature to catch some extra ZZZs in the morning.

HGTV URBAN OASIS® 2022

A welcoming kitchen is the heart of your home — a gathering space for everyone in your household to catch up amid the hustle and bustle. Our skylights open your space, adding visual interest and making your kitchen look bigger. They extend a friendly invitation for guests to relax and refresh while also brightening the room and bringing the natural light you need for detailed cooking tasks. Pulling fresh air in to reduce humidity and cooking odors, our skylights will rejuvenate your kitchen and help it perform better.

FEATURED SKYLIGHT:

We recommend our No Leak Solar Powered Fresh Air Skylights for spaces where things get heated. Between cooking and baking, you'll want a skylight that opens and works with a window below to release warm air while pulling in cool, fresh air without stealing valuable cabinet space and storage. Our Solar Powered Skylights also qualify for a 30% federal tax credit.
